

# Helping Children with Autistic Spectrum Condition to Learn

This Speak Clearly workshop will be led by Naomi Mason, Consultant Speech and Language Therapist - an autism specialist renowned across the UK for her inspiring and fun teaching style.

- She will introduce you to heaps of practical ideas, and show you how to develop an individualised plan that is not only fully workable in a busy classroom, but will have dramatic and immediate impact on the child's ability to concentrate and learn.
- You will learn why these children find eye contact difficult, reasons for their difficult behaviours, and how their different sensory system means that they understand the world quite differently from other children.
- By the end of the evening you will feel competent and confident in using a range of practical techniques that you can put to immediate use for the benefit of your children!

“Simply Inspirational”
