

I have to tell
him over and
over again

He needs
more
VERBS!

The words seem to
be on the tip of his
tongue

Mind your Language!

I wish he would
ask more
questions

His attention span
is just seconds

Having a
conversation with him
is SUCH hard work

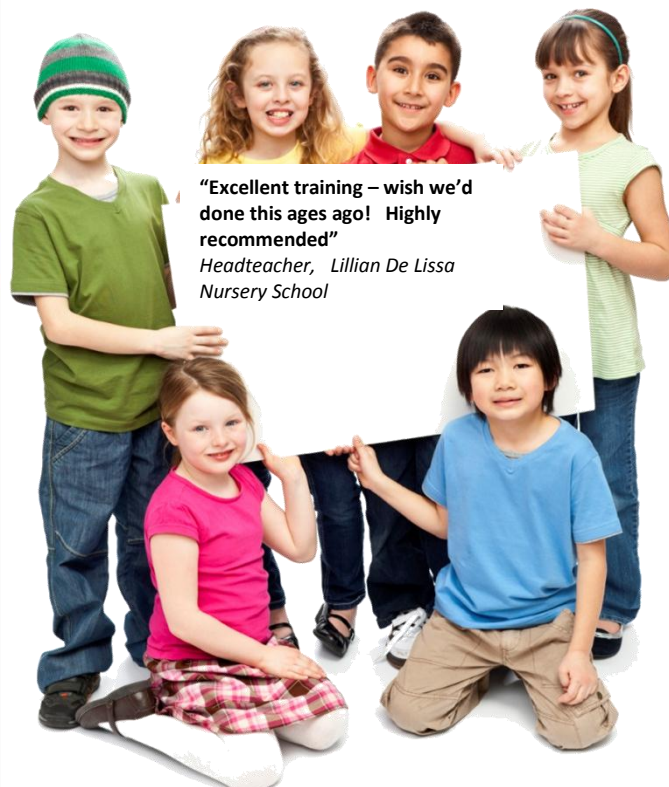

Is it just
immaturity or
do I need to
refer him?

This workshop explores typical and late development of language in young children.

Naomi will explain to you:

- How to assess his language and decide what to work on first
- About attention and listening skills, and fun ways to help
- How to help children to store and retrieve vocabulary
- How auditory memory impacts on his understanding
- The difficulties he may encounter in making his own sentences
- Practical classroom strategies to help him use his language skills more effectively

It is a must for Nursery/Primary teachers and assistants alike.

We specialise in delivering the highest quality and best value training packages across the UK
