

Speak, Listen, and Understand!

Identifying and supporting children with
Speech, Language and Communication needs

We will help you to enhance speech and language development, including

- Improving attention and listening
- Helping children to learn, and store new words
- Building skills in understanding and using sentences
- Working out which speech sounds are causing difficulties, and how to put it right
- Teaching children to “tune in” to sounds and improve both speech and literacy
- Knowing which children are simply immature, and who needs to be referred for further help
- Heaps of practical strategies to help the children who are struggling

By the end of the workshop you will feel confident in using a range of classroom assessments and teaching tools for the immediate benefit of your children.

“The most useful training I have ever attended”

Cathryn Strete, Hatchell Wood School
